SUMMARY

As a passionate Frontend Web Developer, I specialize in creating engaging digital experiences using HTML, CSS, JavaScript, Next.js, and React.js. I have a proven track record of building various websites that captivate users.

ACCOMPLISHMENTS

Developed mobile-first responsive websites: Ensure a seamless user experience on various devices, prioritizing mobile, for easy access and navigation.

Translated a website to 4 languages using i18next: Expand global accessibility by translating content into multiple languages, catering to a diverse audience and improving user-friendliness.

Created interactive web pages with HTML, CSS, JavaScript and Next.js: Enhance engagement through dynamic, responsive, and visually appealing content, providing users with an immersive browsing experience.

PROJECTS

Volunteer events website

<https://pebble-work.vercel.app/>

team leader. Creating pages. Fetching Data from Firebase. Translating website in 4 languages using i18next. Adding some details and styling.

E-commerce website

<https://souгна.vercel.app/>

creating page and fetching data using API and creating some components

Movies website

<https://reelio-topaz.vercel.app/>

working with GitHub API fetching Data in one component
